therein. [Project number: 2020-1-CY01-KA226-HE-082724]

## Mission

OLMEdu seeks to create an open lab for the up skilling of Higher Education Staff (HES) in online management education.

## Challenge

The OLMEdu project addresses the challenge of digital transformation in Higher Education (HE), which has been imposed the last years, and especially during the covid-19 pandemic. This transformation has stressed the need to offer support and training to Higher Education staff (HES) in acquiring the appropriate ICT knowledge and skills to successfully support e-learning. In Management Education (ME) this process is even more demanding as a set of social and economic studies which is associated with solving problems and decision-making situations.

## Objectives

OLMEdu project aims to:

- provide to Higher Education Staff with the proper knowledge, skills and competences required to facilitate distance learning using technologies and tools of online training.
- cultivate their ability to embed the appropriate pedagogies into the online environment and form their teaching-learning process using online methodologies.
- create training activities and learning material for Higher Education Staff that will help them effectively create positive learning environments for their students.
- create the capacity of Higher Education Institutions' training staff to develop online simulations that can be integrated in their training practices.
- create an open access learning repository and online community of practice for the development of online training delivery skills and competences for Higher Education Staff.

# Target Groups

- Higher Education Institutions (HEIs) and organizations involved in Management Education training (direct users)
- Educational staff at HEIs in the field of Management Education and Leadership (main beneficiaries)

## Intellectual outputs of the project

- io1:** Training content for the up skilling of Higher Education Staff in the use of ICT technologies and on-line training in management education
- io2:** Learning material for the use of on-line training and ICT technologies in teaching management
- io3:** Toolbox for developing on-line simulations in Management Education
- io4:** Online learning repository for HEI educational staff

## Key Information

start date: 01/ 04/ 2021	project duration: 24 months	Partnership of 4 HEIs & 1 SME	Coordinator: Frederick University
